Quality Review Program for Examined Patent Applications

A new Quality Review Program was instituted in the U.S. Patent Office on April 1, 1974.

The purpose of the program is to evaluate the quality of the product of the patent examining process and to assist in determining where substantive and procedural adjustments in the patent examination process are appropriate.

The program involves randomly selecting a sample of allowed applications from each of the Art Units in the Patent Examining Corps before the applications are forwarded to the Patent Issue Division for Mailing of the "Notice of Allowance." The quality review will be concerned with three major aspects of the patent examining process, namely:

(1) patentability of the allowed claims in view of the prior art of record or other reasons determined by the reviewer.
(2) compliance with current examining practices and procedures; and
(3) correctness of the field of search and the classification of each application.

The quality review program also provides for the re-search of some of the allowed applications in the sample.

If, during the quality review process, it is determined that one or more claims of a reviewed application are clearly unpatentable, the prosecution of the application will be reopened. Only those applications wherein the prosecution has been reopened will reflect in the record that a quality review has taken place.

C. MARSHALL DANN,
Apr. 2, 1974. *Commissioner of Patents.*

Signature to Amendment to Supplemental Register

Heretofore, in amending a trademark application from the Principal Register to the Supplemental Register and there had not been a full year of use prior to the date the application was filed, the statement in the amendment, to the effect that the mark had been in use for a year, was required to be signed by the applicant.

Effective with this notice, the amendment may hereafter be made by the attorney, and the signature of the applicant normally will not be required merely because some of the year of use necessary for registration on the Supplemental Register occurred after the application was originally filed on the Principal Register. If the Examiner has basis for believing that there is some reason for further inquiry or signature by applicant, the Examiner may of course take appropriate action.

The filing date which will be effective for an application so amended will be the date the amendment is filed, as the application when originally filed was not sufficient for registration on the Supplemental Register. Trademark Rule 2.75.

RENE D. TEGTMEYER,
Apr. 4, 1974. *Assistant Commissioner for Trademarks.*

Trademark Applications Under Section 44 Without Specimens and Use

A significant number of applications are being filed under Section 44 of the Trademark Act of 1946 without specimens and without a statement of use, on the basis of the decision in *John Lecroy & Son, Inc.* v. *Langis Foods Limited,* 177 USPQ 717 (TT&A Bd. 1973), so that it appears desirable to provide the public with information as to the manner in which the Patent Office is handling such applications. This procedure has been incorporated into the Trademark Manual of Examining Procedure. However, since the Manual is not yet ready for distribution, this notice is being published at this time.

The memorandum which is being sent with the filing receipt to each applicant who falls within the above circumstances explains the procedure and reads as follows:

U.S. Department of Commerce
PATENT OFFICE

Trademark Application Filed Under Section 44
of the Act of 1946;
(No Allegation of Use and No Specimens)

MEMORANDUM TO ACCOMPANY FILING RECEIPT

The decision in *John Lecroy & Son, Inc.* v. *Langis Foods Limited,* 177 USPQ 717, rendered by the Trademark Trial and Appeal Board on May 7, 1973, appears to indicate that use and specimens should no longer be requisites for applications under Sections 44(d) and 44(e) of the Trademark Act. That decision has, however, been appealed to the United States District Court for the District of Columbia.

In view of the civil action filed in this case, use and specimens as requirements for such applications are not being eliminated. The Office is therefore assigning to the above-identified application a filing date which is conditional upon the ultimate decision in the above case of *Lecroy* v. *Langis,* and is mailing a filing receipt. However, this application will not be forwarded for examination until the decision in the case becomes final. A copy of the drawing will be placed in the search room with the following stamped thereon: "Withheld from Examination—Sec. 44."

The applicant has the following alternatives:

If applicant files specimens and a statement that the mark is in use (such statement being verified or in the form of a declaration under Rule 2.20), the application will be forwarded for examination with a filing date of the date of receipt of the specimens.

If a statement of use and specimens are not filed, the application will be withheld from examination until termination of the appeal of the above decision. If the decision is affirmed, the application will be forwarded for examination. If the decision is reversed, the application will become an informal application and the papers will be returned.

C. M. WENDT,
